

### **The twenty third magazine of the TV series “Step by Step”**

The **23<sup>rd</sup> magazine** of the TV series “Step by Step” deals with the improvements in towns and municipalities thanks to the *Exchange* program.

**The first story** is from Koceljeva

*Dragoslav Atic, professor of physical education, has been trying for years to organize his gym classes in a classroom arranged as a mini gym at Koceljeva primary and high schools. Koceljeva finally got its first sports hall last year, equipped with funds outsourced from the project aiming at healthier life of this municipality’s citizens.*

**The second story** is from Zrenjanin

*Whenever citizens or entrepreneurs need information about real estate, office space or some location, they do not have to reach for old maps and dig into archives – they can now find it all in the GIS – geographic information system, containing data classified and stored into computer. Public companies in Zrenjanin are finalizing the digitalization of these data, which would in the end be linked into an electronic map, available to everyone.*

**The third story** comes from Arilje

*Senior citizen Radomir Savic has decided to reorganize his estate and get into rural tourism industry. Although almost the entire region makes the living by growing raspberries, the nature gives people other opportunities to earn money. The latest municipal project for improving tourism is providing them with the necessary support.*
